PROFESSIONAL SUMMARY

Full Stack Developer with over 4 years of experience building production products. Specialized in React with TypeScript on the frontend and NestJS with TypeScript on the backend. End-to-end experience across frontend, backend, infrastructure, and CI/CD (Continuous Integration and Continuous Deployment). Focused on performance, scalability, and production deployments on Linux environments with Docker. I integrate AI tools into my daily workflow to speed up development, automate repetitive tasks, and improve delivery quality and speed.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Oreka · Toto (2026 — Present)

- Building Toto, Oreka's product for restaurants.
- Delivering new features and ongoing improvements based on the needs of the business and its customers.

Full Stack Developer — Ecomenu (2023 — 2026)

- Design and technical decision-making on the product's architecture and stack.
- Frontend development with React, TypeScript, Tailwind CSS, Redux Toolkit, and RTK Query.
- Backend development with NestJS, TypeScript, TypeORM, and MySQL as part of a development team.
- Implemented a cross-platform printing module (Windows, Linux, macOS) via HTTP API: PDF generation and management of local and network printers.
- Backend optimization, reducing response times through improvements to SQL queries and business logic. Work with Docker, CI/CD, and Linux servers.

Chemes (2023 — 2025)

- Maintenance and evolution of production systems
- Development and integration of new modules based on requirements
- Performance and existing infrastructure optimization

Full Stack Developer — Cemento Inmobiliaria (2022 — 2023)

- Frontend development with React, TypeScript, Vite, Tailwind CSS, and React Router.
- Backend development with Node.js, Express, TypeScript, Prisma ORM, and MySQL.
- Implemented secure authentication, scheduled tasks (cron jobs), and CI/CD pipelines.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, SQL, Bash
- **Frontend:** React, Tailwind CSS, Redux Toolkit, RTK Query, React Router, Vite
- **Backend:** NestJS, Node.js, Express, TypeORM, Prisma ORM, REST API
- **AI-assisted development:** LLMs (Claude, ChatGPT) and tools such as Claude Code and Cursor — code generation and refactoring, test writing, automation, and technical documentation as part of the daily workflow.
- **Databases:** MySQL, MongoDB
- **Infrastructure & DevOps:** Linux, Docker, CI/CD, production servers
- **Tools:** Git, GitHub, Jira, Trello — remote work in distributed teams

EDUCATION & LANGUAGES

- **Software Engineering** — Universidad Siglo 21 (2026)
- **English B2+ (Upper Intermediate)** — Asociación Argentina de Cultura Inglesa de Santa Fe (2017–2024)
- **Electromechanical Equipment and Installations Technician** — Escuela Técnico Profesional N° 285 (2019–2025)
- **Spanish:** Native
